Work Experience

Full Stack Engineer, Picafuel

March 2022 - May 2023

- Developed and maintained web applications using Python and React.
- Utilized Elastic as a database for data storage and retrieval.
- Implemented Git for version control, ensuring efficient codebase management.
- Hosted and deployed web applications on Amazon Web Services (AWS).
- Created user-friendly front-end interfaces using React.
- Engineered robust back-end functionality using Python.
- Implemented microservices and Rest APIs, enhancing application scalability and modularity.
- Ensured web applications' optimization for performance, security, and scalability.
- Collaborated with cross-functional teams to gather requirements and implement solutions.
- Troubleshoot and debugged application issues effectively.
- Produced technical documentation and provided end-user support.
- Pursued continuous learning for personal and team growth.

Military Service

Developer / Team Leader | Technological Unit, Intelligence Corps, IDF

July 2017 - March 2022

- Managed VMware and VirtualBox Virtualization platforms.
 - Created Python and Bash scripts for automation.
 - Member of the Technological Risks Assessment team.
 - Configured and managed internal networks and VPN servers.
 - Maintained Cisco hardware firewalls and Iptables.
 - Developed and maintained Linux/Windows-based server/client systems.
 - Diagnosed and resolved hardware and software defects.
 - Engineered military systems for encrypted communication.
 - Led Developer Team, overseeing Software, Network, Mobile, and Telecommunications projects.
 - Prepared technical manuals, collaborated with senior officials, and engaged with external parties.
 - Led and commanded two technological courses.
- Managed operational systems and projects across multiple sites
